

2026 COLLECTION

Architectural Pier Cap Collection

A refined selection of standard and custom profiles for rendered fence piers.

Designed to complete the architecture

Thermatech manufactures lightweight architectural polystyrene mouldings at its Southport facility on the Gold Coast, with freight options available throughout Australia.

This collection features 38 standard pier cap profiles, ranging from clean contemporary forms to more detailed traditional designs. Each profile is presented with its overall height and projection, making it easier to compare proportions and select the right finish for fences, entry statements and landscape walls.

CUSTOM PROFILES

Have a shape in mind? Start with a sketch.

Thermatech can review custom pier cap concepts, sketches, photographs and architectural references. Provide the finished pier dimensions, preferred overall size and an example of the desired profile.

01
SEND

Your sketch, photograph or reference profile.

02
SIZE

Confirm pier width and depth.

03
REVIEW

Thermatech reviews proportion and manufacturability.

04
QUOTE

Receive a project-specific quotation.

Selecting the right profile

01 Confirm the pier size

Record the finished width and depth of the pier, including render or cladding.

02 Choose the profile height

Compare the cap height with the pier proportions and adjacent fence panels.

03 Check the projection

The horizontal dimension shown on each drawing indicates how far the cap projects beyond the pier face.

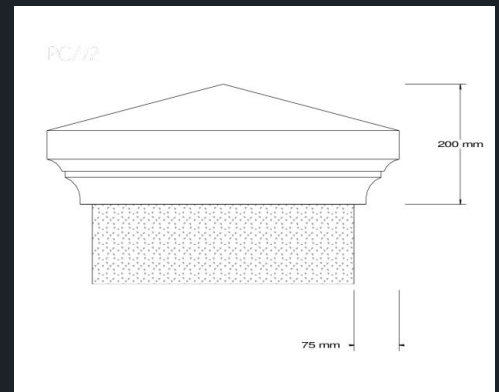

04 Confirm the substrate

Discuss the pier construction, fixing method and coating requirements before installation.

05 Request a custom option

Where a standard profile is not suitable, provide a sketch and key dimensions for review.

DIMENSION GUIDE

Overall height

Vertical dimension shown beside the profile.

Projection

Horizontal dimension shown beneath the pier face.

Need help selecting a profile?

Send the pier dimensions and preferred style to Thermatech for review.
