About Us

Thermatech has been operating since 1989 and is one of Australia's longest-established manufacturers of decorative architectural mouldings and features for the construction industry.

As a family-owned and operated business, we combine quality products with practical industry knowledge and personalised service from an experienced team of building professionals.

We provide installation services throughout South East Queensland and Northern New South Wales. Products can also be delivered for self-installation, supported by comprehensive installation guides and telephone assistance.

Our extensive product range can be manufactured in a variety of sizes and customised to suit the specific requirements of each project.

**01****EXPERIENCE AND SUPPORT**

With more than 30 years of experience, you can rely on Thermatech for exceptional knowledge, quality workmanship and dependable support throughout your build.

02**GOLD COAST MADE**

Manufactured from Thermatech's Southport facility and supplied throughout Australia.

03**LIGHTWEIGHT SYSTEM**

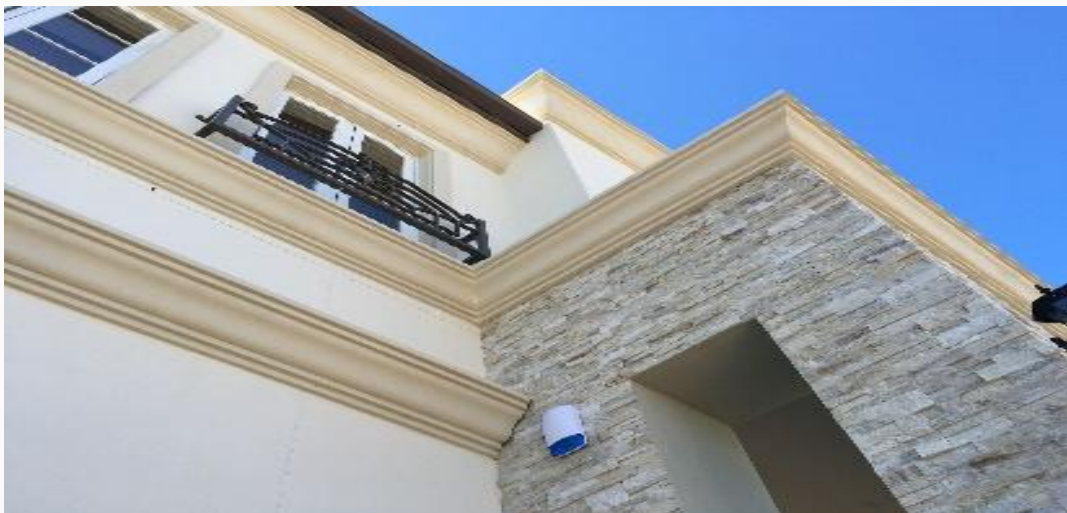

Lightweight architectural mouldings designed for easier handling and installation, without the need for additional structural upgrades to the building.

04**CUSTOM PROFILES**

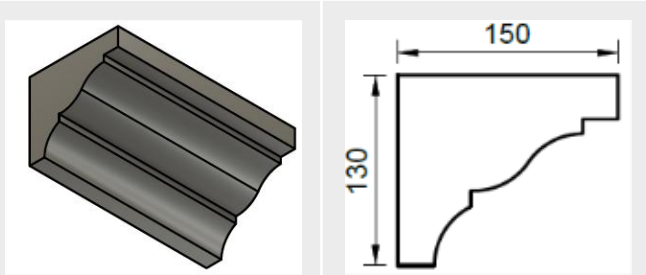

A broad range of designs to choose from or have your mouldings specifically designed to meet your architectural detail requirements

PARAPETS and SOFFITS

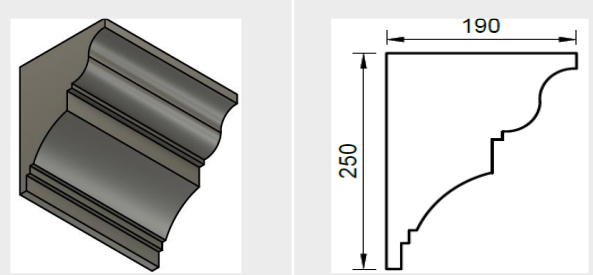

Parapet and soffit moulds add architectural definition and visual appeal to both traditional and contemporary homes. Parapet moulds enhance the top edge of walls and rooflines, while soffit moulds provide a refined finish to the underside of eaves and overhangs. Available in a range of profiles and sizes, these mouldings can also be custom made to suit new builds or renovation projects.

BANDING / DADO MOULDS

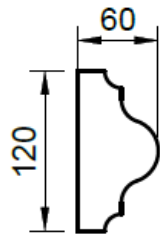

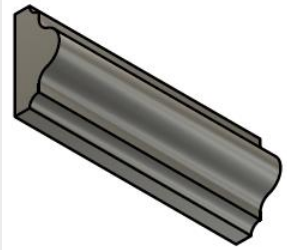

These mouldings are used as a border between different wall finishes or just to provide a break on a large wall surface.

When choosing a dado mould for your project, consider the overall style of your home.

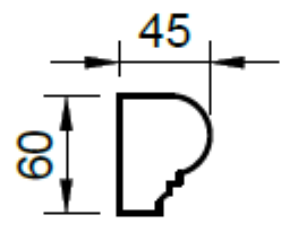

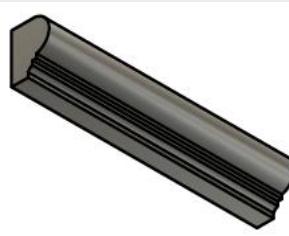

A simple, flat dado mould may be more appropriate for a modern home, while a more ornate profile could work well in a traditional or classic setting.

ARCHITRAVES & SILLS

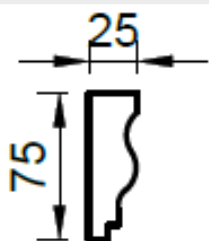

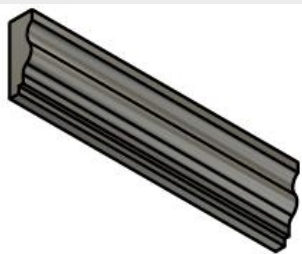

Discover the Timeless Elegance of Architraves & Sills.

Enhance the beauty and functionality of your home with architraves and sills—ornamental mouldings that add depth and style to windows, doors and other openings.

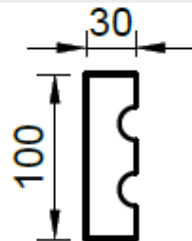

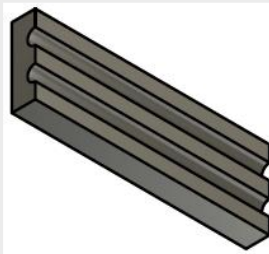

More than just a trim or casing, architraves create a finished and refined look that elevates the aesthetic value of your home.

Columns & Capitals

Thermatech capitals add a refined architectural transition between columns, posts and supporting details.

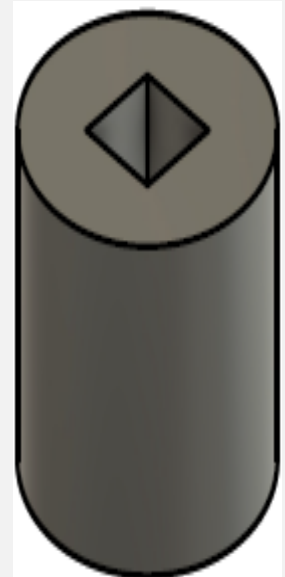

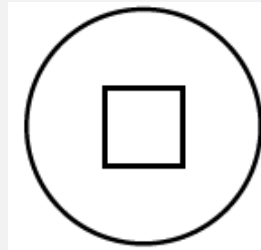

They are suitable for residential and most commercial applications where decorative features need to be lightweight, consistent and easy to install.

CUSTOM COLUMN WRAPS

Have your column wraps custom made to suit your structural posts, project dimensions and design requirements. Thermatech column wraps are manufactured to provide a refined architectural finish while concealing structural supports and complementing the style of your home or commercial project. Available in a range of profiles, sizes and detailing options, each wrap can be tailored to achieve the proportions and appearance you require. Whether you are matching an existing design or creating a new architectural feature, our team can help deliver a practical and visually striking solution.
