

2026 COLLECTION

# Columns & Capitals Collection

---

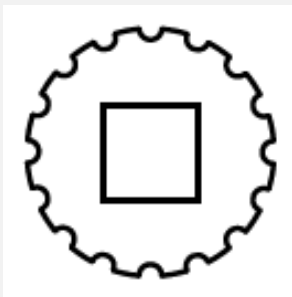

A refined selection of capitals designed to complete Thermatech columns and architectural features.

## Designed to complete the architecture of the home

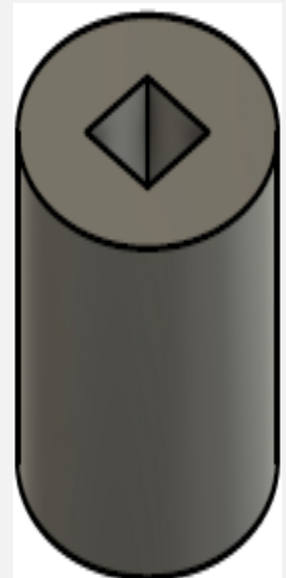

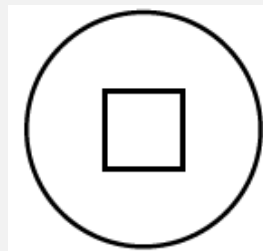

Thermatech columns and capitals create a refined architectural transition between columns and adjoining structural elements. Lightweight, consistent and easy to install, they are suitable for residential and selected commercial applications. Profiles can also be customised to suit specific column dimensions and architectural styles.

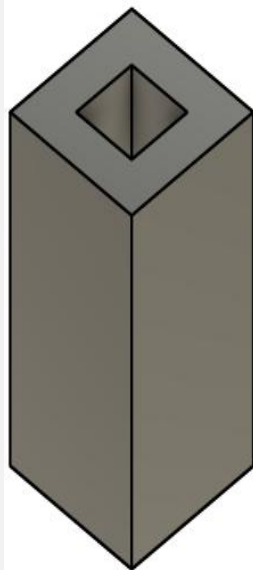

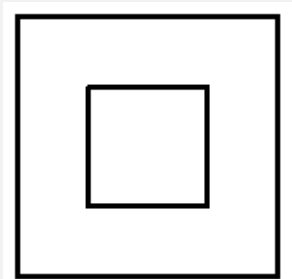

### Fluted

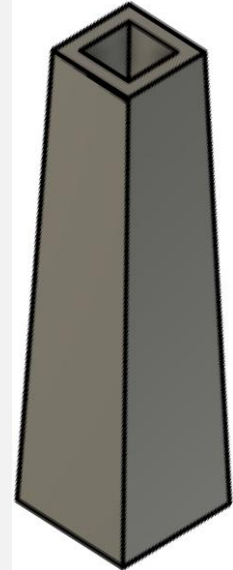

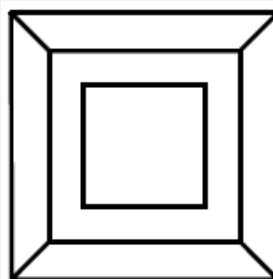

### Round

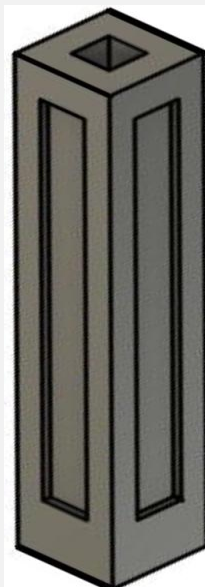

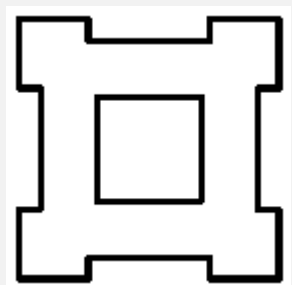

### Square

### Tapered

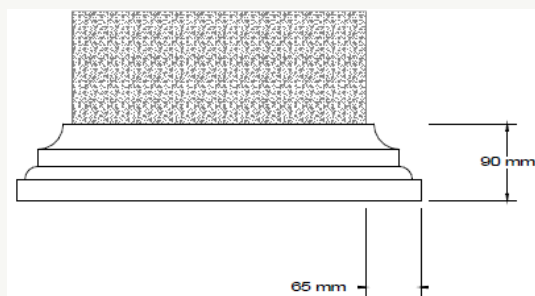

### Recessed

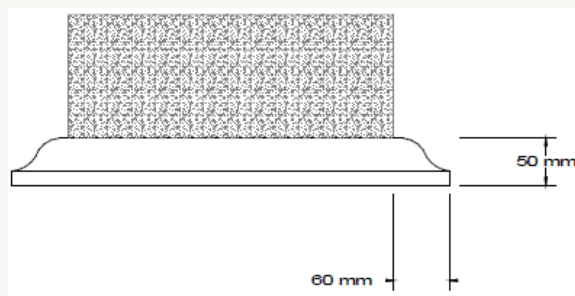

## CUSTOM COLUMN WRAPS

Have your column wraps custom made to suit your structural posts, project dimensions and design requirements. Thermatech column wraps are manufactured to provide a refined architectural finish while concealing structural supports and complementing the style of your home or commercial project. Available in a range of profiles, sizes and detailing options, each wrap can be tailored to achieve the proportions and appearance you require. Whether you are matching an existing design or creating a new architectural feature, our team can help deliver a practical and visually striking solution.

## Have a custom capital in mind?

Speak with our team and we may be able custom one of our designs to meet your project style and required dimensions.

# Selecting the right profile

## 01 Confirm the column size

Record the finished column dimensions—for example, the diameter or circumference of a round column, or the width and depth of a square column.

## 02 Choose the profile

Compare the capital height with the column's proportions and other mouldings being used.

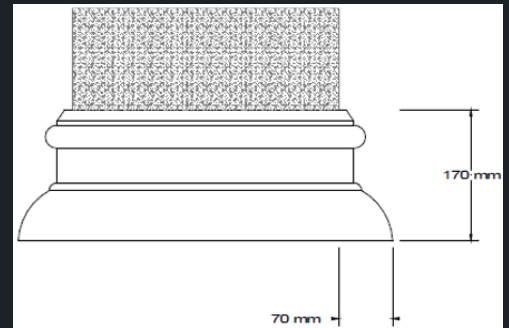

## 03 Check the projection

The horizontal dimension on each drawing indicates the projection illustrated beyond the column face.

## 04 Confirm any other requirements

Confirm whether a square top or base is required to suit the column shape and surrounding architectural details.

### DIMENSION GUIDE

#### Overall height

Vertical dimension shown beside the profile.

#### Projection

Horizontal dimension shown beneath the capital.

### Need help selecting a profile?

Send the column dimensions and preferred style to Thermatech for review.
